SAFPoly3D vs. NeoKinema @ 3 km

x: **dot product of most compressive eigenvectors**, e_3

A = SAFPoly3D vs. B = NeoKinema at depth 3 km

range: -1 < x < 1, perfect match: x = 1, $\langle \rangle$ is geographic mean

$x = e_3^A \cdot e_3^B$

misfit, $\langle x \rangle$ = 0.95

N/N_0 [%]
